

**IMPLEMENTATION OF A JOINT EXERCISE OF PREPAREDNESS  
BETWEEN DESFA SA TLS SOUTHERN GREECE - EPA ATTIKIS - FIRE DEPARTMENT**

On 20/06/2011 a joint preparedness exercise was held between DESFA SA TLS SOUTHERN GREECE - PSC ATTICA - FIRE BODY codenamed "KYKLOPAS 2011." The exercise was organized in collaboration with the Directorate of Safety, Quality & Environment.

The scenario of the fire drill was: NG leak accompanied by direct combustion at the forecourt of the Ano Liosia Metering/Regulating Station which partly falls under the responsibility of DESFA and the responsibility of EPA Attica. Specifically, the part of the scraper traps in the North AB networks, at which EPA Attica is responsible.

The firefighting force involved was:

1. The patrol vehicle 10-30 of the 10<sup>th</sup> FD of Athens (1 vehicle, 2 Firefighters)
2. The 10<sup>th</sup> FD of Athens - Fire exit (2 Vehicles, 7 Firefighters)
3. The 10<sup>th</sup> SD of Athens – D Type Fire Exit (1 vehicle, 2 Firefighters)
4. Support by the “Eleusis 21” patrol vehicle (1 vehicle, 3 Firefighters)
5. Support by the D type vehicle from the 1<sup>st</sup> EMAK (1 Vehicle, 3 Fire Firefighters)

EPA Attica's participation involved the medium pressure mechanic and two medium pressure crews. On behalf of the SOUTH AREA TLS, the stand by engineer and the stand by operator participated.

For educational purposes of the Fire Department, a controlled gas release from middle and high pressure was put into practice, as well as a presentation of the odorization area of the metering / regulation station.
